Please select the folder where you want the new project to be created as well as its title.

Project title:
Example 1

Folder to create project in:
C:\Users\ink\Desktop\Wksh

Project filename:
Example.cbp

Resulting filename:
C:\Users\ink\Desktop\Wksh\Example\Example.cbp

A screenshot of a Windows command prompt window. The title bar at the top shows the file path "C:\Users\ink\Desktop\Wksh\example\bin\Debug\example.exe" and standard window controls (minimize, maximize, close). The main area of the window contains the following text: "Hello world!" on the first line, "Process returned 0 (0x0) execution time : 0.047 s" on the second line, and "Press any key to continue." on the third line. The text is displayed in a monospaced font. A vertical scrollbar is visible on the right side of the window.

```
C:\Users\ink\Desktop\Wksh\example\bin\Debug\example.exe
Hello world!
Process returned 0 (0x0) execution time : 0.047 s
Press any key to continue.
```

Exercise:

Write and run the following code:

```
#include <iostream>
using namespace std;
int main()
{
    int a, b, c, d, e;
    cin >> a >> b;
    c = 1;
    d = 2;
    e = a + b*(c+d);
    cout << e;
}
```

Solution of Exercise 1.01:

Algo Exo1_1

Var

a,b : Integer

Begin

Read(a)

b ← a*3

Write(b)

End

For a = 2 , b =

For a = 3 , b =

Solution of Exercise 1.04:

Algo Exo1_4

Var

A, B : Integer

C : Real

Begin

Read (A)

B ← 0

A ← A * A

B ← A + B

C ← A + B / A + 5

Write (C)
